VOL. 11 NO. 47 Lancaster Farming, Saturday, October 22, 1966 $2 Per Year

LANCASTER COUNTY FARMERS ASSOCIATION SPEAKER Gerald A. Biggs, president of the Pennsylvania Farmers Association, is flanked by Noah W. Wenger, left, president of the county association, and Harold Rohrer, PFA State director for Adams, York, and Lancaster Counties. L F Photo

Farmers Must Get Their Story To Consumers Or Be Federal Wards, County Association Members Told

The federal government has a "Master Plan" that will appear to supply cheap food to this nation of consumers by leveling the price on agricultural products and making up the difference to the farmer through a direct subsidy This is the threat which hangs over the head of the American farmer, Pennsylvania Farmers Association president Gerald Biggs told some 250 Lancaster County Farmers Association members Tuesday night at their annual meeting at the Blue Ball Fire Hall

The only alternative to this master plan is for farmers to get their story across to Mrs Consumer, Biggs said "This is a job you can't hire anybody to do, only the farmers themselves can do it," Biggs stated.

The present food plight in this country is "the result of 30-odd years of federal controls, which have been the greatest failure and most costly program known to mankind," the PFA president said

He suggested that, if at the close of World War II, government controls had been removed and farmers allowed to seek their own levels in agricultural production, "we would not be in the situation we are in today Today we're pinned down in one of the worst positions imaginable for American agriculture"

Biggs said that in 1961 the total gross agricultural income was $34 billion while total production costs were $14 billion. In 1965 total income was $44 billion and costs crept up to $34 billion In 1961 agricultural net income was $20 billion, compared to the $10 billion difference between costs and income in 1965

Livestock Exp. Makes Ready For Over 3500 Head

HARRISBURG — Animals in the 18th Pennsylvania Livestock Exposition Nov 5-12, will total over 3,500 Harold R McCulloch manager said this week Beef cattle, hogs, sheep, and horses in the main event will total 3,254, well above average for these shows. More than 250 mounts will perform in the Pennsylvania 4-H Horse Show closing event on the week-long program

Beef cattle total 773, sheep, 1,092, hogs, 1 044, and horses, 345 In the exposition for the first time will be Quarter horses, with 147 head, and Charolais beef breeding cattle, with 68 entries

Shorthorns lead in beef breeding cattle with 101 head. Angus follow with 89, Polled Hereford 83 Charolais, 68;

"The Man In The Mirror" Holds Key To Success, Dairymen Told

When dairymen run into herd health problems they are inclined to blame everyone but the right guy, Penn State University extension veterinarian Samuel Guss told some 185 area farmers Tuesday in an all-day dairy seminar sponsored by Miller & Bushong, Inc, and held at the Guernsey Sales Barn, Lancaster

"Look in the mirror," Guss said "There's where you'll find the answers when your cows don't get bred right, don't freshen on schedule, or, don't clean right Your own management is the principal factor in your herd's health," he said.

Guss outlined a number of dairy herd problems that are often solved with drugs, when good management in the first place would have avoided the problem He drew an enthusiastic response when he suggested there were too many "Cadillac cows managed by Model A intellects" in the dairy business — "and even some Model T intellects," he added

Another speaker during the

(Continued on Page 9)

Farmers Told To Beware Inflated Hay Prices

HARRISBURG — Pennsylvania dairy and livestock farmers, fighting off the crippling effects of another drought year, face a new economic threat in sharply rising hay prices, State Agriculture Secretary Leland H. Bull declared this week

"Some suppliers in New York and Ohio late last week raised hay prices an average of $10 a ton, especially when dealing with buyers from drought-stricken areas," Secretary Bull said. "This could be disastrous for Pennsylvania dairymen and livestock farmers who have been buying emergency hay supplies in those states."

Farm Calendar

October 25—6 45 a m, County Livestock Tour leaves by bus from Lancaster Shopping Center

—10 a.m, County 4-H Capon Club Exhibit at Elks Club, 219 N. Duke St, Lancaster.

October 27 — 2:45 p m, 22nd annual FFA leadership training conference; at Warwick High School, Lititz

—7.45 p m, 4-H County Council at Farm Credit Bldg, Lancaster, Theme — "Citizenship in Action". Speaker and panel.

October 28—9:30 a m., Wayne Dairy Field Day, at James Kreider farm, Quarryville R1

—6:45 p.m., Annual 4-H Dairy Club banquet at Methodist Church, Quarryville.

Weather

The weather outlook for the next five days calls for temperatures to average near, or slightly above, the normal range of 64 to 42 degrees. The coolest part of the period will be early next week.

More rain is predicted with amounts totaling up to ½-inch. This will occur mainly about Monday.

Five Area Holsteins Post New Records

Five registered Holstein cows in Lancaster County herds recorded new production marks, according to the Holstein-Friesian Association of America.

A four-year-old, Spring Lawn Lad Ax Vune, owned by Jay C Garber of Lancaster, produced 16,730 M and 575 F

In the Robert C Groff herd, Quarryville, eight-year-old Groffdale Lucky Nima had 18,550 M, 614 F, in 312 days

Beauchamp Capper Ebony, seven-year-old, owned by Kreasle & Foulk of Quarryville, had 17,560 M. 605 F, in 305 days

In the Clarence Murry herd, Drumore, a six-year-old, Kinview Patsy Edgeware, produced 16,820 M, 594 F, in 348 days Wissler-Run Echo Ida, three-year-old, had 17,640 M, 549 F, in 305 days

Milk Handler Pool Fate Still Undetermined

The fate of the Order 4 milk handler pool has been in the government's hands for more than a year since it was originally marked for doom by agriculture secretary Orville Freeman The final decision to dump or retain the Order will not now be forthcoming until after election day

So said James Honan, general manager, Inter-State Milk Producers Cooperative, Wednesday night Honan, speaking to nearly 200 dairymen at an Inter-State District 6 meeting at Gap Fire Hall, said, "We will not get an answer on this, one way or another, until after November 8"

Honan told the dairy farmers and their wives that 34

Brubaker Wins National FFA Office; Becomes 2nd Countian So Honored

It was an exciting day at Kansas City, Missouri, last Friday for Harold J Brubaker of Mount Joy R1, and it marked an historic occasion for Lancaster County

Nineteen-year-old Brubaker became the second Lancaster Countian ever to be named to a national office in the Future Farmers of America when he was elected vice president of the 12-state North Atlantic region

Brubaker, the son of Mr and Mrs Paul N Brubaker, graduated from Donegal High School in 1964 He is a member of the Elizabethtown FFA Chapter Presently, he is studying animal husbandry at Delaware Valley College of Science and Agriculture at Doylestown, and plans eventually to follow a career in veterinary medicine At the moment, he hopes the duties of his new office will permit him to finish the current semester at college.

Brubaker attended the national FFA convention as a candidate for the American Farmer degree, highest award obtainable to FFA members. Two other Lancaster Countians (see Lancaster Farming, Aug 20, 1966) also received

County Study Spotlights Water Problems

A massive study of Lancaster County water resources was released to the public this week by the county planning commission. From conception to birth, the study took six years and cost $47,100. The final publication measures some 600 pages and weighs three pounds and one ounce.

Water resources have played a vital role in the past growth and development of Lancaster County. This study shows that water will continue to be vitally important in future growth of the county.

It is impossible to summarize such a broad and important study in a few words. We will attempt to tell you here what the study did, and in the coming weeks we will try to digest the highlights of the report, bringing to you those phases of the program which will have a particular bearing on the farm and rural communities in the county.

For example, the study inventoried the county's water resources through investigation of the seven principal watersheds — Conewago, Conoy, Chickies, Conestoga, Pequea, Conowingo, and Octoraro. It also classified the county by areas for potential yields of underlying ground water. It assayed the county's thirty water supply systems for present and future usage.

Two time horizons, 1985 and 2010, were used in estimating future population and water needs.

By the year 2010, almost all communities in the county are expected to join in a project to utilize water from the Susquehanna River. This source will furnish 90 percent of the county's water needs by that time.

Also studied was the water quality of the major streams. This showed that at periods of low-flow most of these surface water sources were unreliable, and pointed up the immediately pressing problem of improving stream water quality Only three of the 12 streams studied were found to be presently in satisfactory condition!

It was pointed out that the short-run solution to our water problems lies in greater development of ground water sources. But after 1985, only the Susquehanna River will adequately meet the county's growing water needs.

The study also showed that pollution in some streams is presently a greater problem than was generally thought, and will become increasingly important as time goes on. In other words, we're putting pollutants into our streams at a faster rate than they can be handled, especially with the low-flow condition of most streams. This led planning director Ellis Harned to observe that "Dilution is not the solution to pollution".

The study also showed the pressing need for a forthcoming sewage study, and suggests some of the methods of disposal that must be considered. According to county planner Jack Gibson, sources of aid for such a sewage study are now being examined, but no timetable has yet been set.

What Price Games?

Housewives in several sections of the U. S. have been ganging up on their local supermarkets recently, protesting the rising cost of the weekly food basket. Whether or not this will bring down the cost of feeding up your family remains to be seen. We doubt that it will have any long-run effect.

One supermarket official commented this week that prices could be reduced in the markets, but that it would mean cutting out trading stamps, games, contests, and many of the "services" now being offered. To this we can only say, **WONDERFUL.** Perhaps shoppers will come to realize that they alone are paying for all these gimmicks, not the stores. And on top of that, the checkout process would certainly be speeded up.

The National Commission on Food Marketing reported in its Technical Study No. 7, that an analysis of supermarket operating costs showed "an increase in sales volume of about 40 percent lowers costs about 2 percentage points — **the approximate cost of trading stamps.** While there may be many other justifications for the adoption of trading stamps," the report goes on, "this analysis suggests the opportunity to pay for stamps by increased volume is somewhat exaggerated."

The study notes that in the early expansion of chains, competition centered on price. Now competition has shifted to nonprice promotion including games, trading stamps, and more elaborate stores.

If elimination of all that game and stamp nonsense would result in a reduction in retail food prices, we're all for it. One thing for sure, it would make shopping a more businesslike and speedy operation.

THE BIBLE SPEAKS

International Uniform Sunday School Lessons

BY LAWRENCE W. ALTHOUSE

In His Hands

Lesson For October 23, 1966

Background Scripture Isaiah 36 and 37.

Devotional Reading Psalms 94 12 22.

What is security?

To "Linus" in the famous comic-strip, Peanuts, by Charles M. Schultz, security is a blanket that is dragged with him wherever he goes. To many so-called "grownups," security is "money in the bank" or steaks in the freezer. For others it is a home in the "right neighborhood," a job with the "right company," or marriage into the "right family." To some, security may be another person upon whom we may depend to take care of us.

Rev. Althouse

What is it for you? Which of the above factors or others like them is the source of your security? Or is security for you, as it is for some, the conviction that you are in His hands?

Secure From What?

It is not enough to confess that God is the source of our security, for there are many who have depended upon God who have had to bear all kinds of troubles, pains, and afflictions. How secure were the Roman Christians fighting wild beasts in the arenas? How secure were the martyred missionaries in the Congo? How secure is the devout Christian dying slowly in a hospital bed?

Some time ago I read in the newspaper of a man who was held as a hostage for two weeks by an escaped convict who was wanted for murder. After 14 days of a nightmarish existence, the convict was disarmed and his hostage set free. Interviewed by a reporter, the man who had been the hostage said that the only thing that had kept him going through this ordeal was his faith in God. Did he mean that he was certain that God would prevent the man from killing him, the reporter wanted to know? "Oh no," replied the man quickly. "I had no assurance of that, I just knew that whatever he did to me, kill me or let me live, I was in God's hands."

Security that finds its source in a faith in God does not guarantee our safety from harm. This is what is meant in Martin Luther's hymn, **A Mighty Fortress Is Our God:**

Let goods and kindred go,
This mortal life also;
The body they may kill,
God's truth abideth still;
His kingdom is forever!

The security of a faith in God is not security from trouble, but security in the midst of trouble. As the hostage put it, it is the knowledge that whatever happens, we are in God's hands.

In, Not From

Christian faith, then, is not a guarantee of the safety of our material goods. Nor is it an assurance of the health and material welfare of those whom Luther terms our "kindred." Life itself is not assured for the body is easily killed. Through the stupidity and the sinfulness of both ourselves and others these are easily lost or taken from us. But the provident love of God—that's something else. As Paul puts it, nothing "in all creation, will be able to separage us from the love of God in Christ Jesus our Lord" (Romans 8:39).

Security in danger, not from it. There is no greater example than in the death of Jesus. To the world he was a failure, to his disciples a disappointment; he had not been victor in escaping suffering and death. His victory came in the midst of it. "Father, into thy hands I commit my spirit."

What is security? It is the "Mighty Fortress" we enter when we place ourselves in His hands.

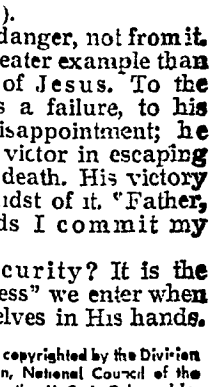
To Utilize Lush Pastures



SMITH

Livestock producers might still get a lift from the weatherman because of the good moisture conditions and the cooler weather. With most species of grasses, and with good fertility, excellent grazing may be available until winter arrives. When using pastures during frosty and cold weather it is best to graze the animals only when the forage is dry; also, it is advised to give them a feeding of some roughage before turning to the pasture.

To Winterize Water Pipes

Since the first cold weather of the season has been experienced in most areas, we should be giving attention to zero weather and the water systems to the various buildings on the farm If they cannot be buried at least 24 to 30 inches below the surface of the ground, and are not inside a heated building, special effort should be exercised to prevent trouble when the weather is bad Electric heating cable is available to wrap around the water pipes. Special installation suggestions should be followed to make these cables safe to use The local electrician or power company official should be consulted.

To Sell Cattle When Finished

This is easier said than done when prices are on the soft side, however, in most cases it does not pay to feed cattle above 1200-pounds because gain efficiency decreases. It takes more feed to put on a pound of weight and these heavier cattle are usually discounted on price because of the excess weight. The gamble on higher prices might pay off once in a while, but usually it is a losing practice to keep them after they reach this weight.

HEILBRON PRESIDENT OF LIVESTOCK GROUP

Robert S Heilbron, Lancaster, has recently been elected president of the Pennsylvania Livestock and Allied Industries Association, cosponsor and operating agency for the Pennsylvania Livestock Exposition

Member of a commission firm on Lancaster's Union Stock Yards, Heilbron succeeds Dr Dean L Snyder, Kansas City, Mo, formerly of Annville

The exposition, now in its tenth year, will be held Nov 5-12 in the State Farm Show Building, with the State Department of Agriculture and its Farm Show Commission as joint sponsors

Zimmerman Cow Named Excellent

Paul B Zimmerman, Ephrata, has been notified by the Holstein-Friesian Association of America that a registered Holstein cow in his herd has received an "E" designation for body type conformation

On the basis of her previous classification of "Excellent", Maxhill Pathfinder Beulah has been awarded 2E designation

This new phase of the Holstein Association's long-time breed improvement program provides additional recognition for "Excellent" cows that are reclassified "Excellent" beyond the age of maturity A cow may be designated 2, 3, or 4E according to her history of previous "Excellent" classifications within specified age brackets

Among the 75,000 Registered Holsteins scored for body type, each year, only slightly more than one percent attain "Excellent" status

The food industry is providing somewhere in the neighborhood of 210 billion meals per year at an average cost of less than 40 cents per meal.

Warwick FFA To Host Area

The Warwick High School FFA will be host to the 22nd annual Leadership Training Conference of the Future Farmers of America for the York-Lancaster Area on Thursday afternoon and evening, October 27

The conference will open at 2 45 p m in the auditorium with ceremonies conducted by the Lancaster County officers and an address by Glenn Weber, state FFA president

Each of the officers from the 18 chapters in the area will attend meetings covering their office and their responsibilities This will be followed by sessions in parliamentary procedure, public speaking and assembly programs

A banquet will be served in the high school cafeteria, followed by a session in the auditorium featuring the four American Farmers from the area and a panel discussion by the 'Chapter Sweethearts."

senators and congressmen in the producing area have helped in the fight to retain thecern for the future of the handler pool under Order 4. He said a decision could probably be expected between November 8 and New Year's Day.

Honan also expressed concern for the future of the Pennsylvania Milk Control Commission, which is getting close scrutiny from both gubernatorial candidates.

He urged dairymen from the four locals — New Holland, Witmer, Christiana, and Paradise — to support the PMCC, and to help keep it, as amended.

Honan predicted the market for milk will continue good through the coming year. He sees a stable and expanding market since "we still have a problem of balancing supply and demand."

Other speakers included Melvin R. Stoltzfus District 6 president, Melvin M Brendle, District 6 director, Victor Plastow, associate county agent; and Lancaster County Dairy Princess Carol Hess

A Dynamic Future Awaits You!!

Business-minded poultrymen as well as poultry-minded businessmen are essential in the years ahead.

Before you graduate from high school is the time to start planning your future career. We submit that one of the most rewarding careers in the years to come is to be found in some phase of agriculture

Tremendous increases in population — in this country and all around the globe — will continue to create a demand for more and more food. Supplying that food will be a **major task . . . no job** in the years ahead will be **more important.**

American agriculture, as a whole, has experienced phenomenal changes in the last few years. No branch of agriculture has had more spectacular growth or development than has the Poultry Industry.

Whether it is in the field of:

Genetics,

Nutrition,

Production,

Marketing,

Research,

or the

hundred and one other segments of Poultry Industry — the opportunities for satisfying and profitable careers are virtually **unlimited.**

Meet the challenge of the future!

The Poultry Industry, along with all of its diversified allied industries, desperately needs **COLLEGE TRAINED** personnel.

You're sitting on a wonderful opportunity

Plan now to take advantage of it!

●

MILLER & BUSHONG, INC.
ROHRERSTOWN, PA.
"Makers of Fine Feeds Since 1875"

● Hay Warning

(Continued from Page 1)

"check local prices through reliable sources" before buying. At the same time, Bull branded the increase "ridiculous and unnecessary, in light of an above-average hay crop in the nation this year."

The U.S. Department of Agriculture on October 1 estimated 1966 hay production in the nation at 118,109,000 tons. This compares to a five-year average (1960-64) of 117,763,000 tons, the Secretary pointed out.

By contrast, Pennsylvania's 1966 hay crop is estimated at 3,138,000 tons, the smallest since 1962 and 8.4 percent less than last year's production.

Both hay and corn, basic feeds of dairy and beef cattle, were ravaged by Pennsylvania's fifth consecutive year of drought. "Many farmers were forced to feed first cutting hay during the dry months and now have little, if any, on hand for winter feeding. This means they must buy hay, and it is important that they buy it as economically as possible if they are to continue producing milk and meat," Bull cautioned.

At the same time, he pointed out that Pennsylvania farmers are harvesting their smallest corn crop in 36 years — and possibly the second smallest crop in a century.

Corn production in the state this year is expected to total 32,604,000 bushels of grain, according to latest estimates of the Pennsylvania Crop Reporting Service.

If so, it will be the smallest corn crop in the state since 1930 when production totaled only 19,074,000 bushels of grain. That was the year of depression, dust storms in the West and drought in Pennsylvania — a drought almost as severe as the one that parched state cropland this past summer.

(Weather Bureau records show rainfall in 1930 was eight to nine inches below normal. In the first eight months of 1966, rainfall deficiencies in most of the state ranged from 5.72 to 8.89 inches.)

The state's 1966 corn crop, Secretary Bull pointed out, is than last year's production. It also is 36 percent short of the 1960-64 average, and scarcely more than half the size of the crop produced in 1958. That year, Pennsylvania farmers harvested a record 61,974,000 bushels of grain.

The previous high was set in 1919 when production totaled 61,916,000 bushels. That was the first year in which records were kept for corn harvested as grain and that produced for silage.

Between 1866 and 1918, the smallest corn crop was reported in 1893 when 34,750,000 bushels were harvested for both grain and silage.

Order 4 Milk Price Gains 57c Over Year Ago

by Everett Newswanger
Staff Reporter

The average price paid to farmers for milk produced in September under the Delaware Valley federal order averaged $6.15 per hundredweight at 3.5 percent butterfat, according to the latest report from the Market Administrator. This is 13 cents above the August price approximately 35 percent less this year and an increase of 57 cents from the market average for September 1965. Adjustments for milk containing butterfat of more or less than the 3.5 standard will be at 9 cents per tenth of a percent.

The sharp September-to-September rise in the market price was the result of the combination of a 40-cent higher Class I milk price ($6.40); a Class II return ($4.30) that was 94 cents above a year ago, and a Class I utilization rise of over 4 percentage points to 86.61 percent.

The 86.61 percent of producer receipts utilized for fluid milk purposes during September represents the highest percentage since October 1964.

Order No. 4 plants received milk from 4,894 producers in September, who delivered an average of 984 pounds daily. A year earlier, 5,397 producers were reported by the order handlers and the daily average shipment was 926 pounds. Because the yearly gain in milk deliveries per producer did not compensate fully for the fewer number of dairy farmers, market milk receipts declined 3.6 percent from September 1965.

Total fluid milk sales were 6.3 percent more than the Class I marketings last September. Daily fluid milk sales of 4.62 million pounds in September compared with 4.24 million pounds per day the previous month.

What makes this little pellet your big milk producer?

First, Agway's Nu-Milkerpels 16 is 100% pelleted. This saves you time and labor, because the pellets flow freely in bulk bins and automated systems.

Full pelleting also allows Agway to use lower-cost (yet high milk-producing) ingredients than the ingredients which must be used in making a natural-textured feed. This lowers the cost per unit of energy or TDN in Nu-Milkerpels—which is reflected in its price to you.

Nu-Milkerpels contain urea as a protein source. Why? Urea makes high-quality protein quickly available in the cow's rumen. She makes more milk—and research indicates urea aids in the digestion of fiber in the ration.

Nu-Milkerpels use *lignin sulfate* as the pellet binder. This organic material, unlike the inert clay in many pellets, actually adds feeding value to the pellet—about $1.50 worth per ton.

Agway puts into this pellet everything that is known on the subject of how to make a dairy pellet profitable for you. Test this statement. Compare Nu-Milkerpels' 75 therms of milk-making energy, and its price, against the energy and price of your present dairy ration.

Then put these economic facts to work for you. Order Nu-Milkerpels 16. *Agway Inc.*

47th Anniversary For Farm Women No. 3

Society of Farm Women Group 3 celebrated its 47th anniversary at the home of Misses Mary N. and Ada S. Royer, Ephrata R2 — the only two surviving charter members of the Society which was organized in 1919.

At the recent meeting, a formal tea was held honoring the 12 past presidents still members of the Society. They are: Mrs. Irvin Burkholder, Mrs. Samuel M. Mohler, Mrs. Walter Lepole, Mrs. Harold S. Stuber, Mrs. Harry Palm, Mrs. William B. Eberly, Miss Alva Stuber, Mrs. Robert Hollinger, Mrs. Ivan Eberly, Mrs. Robert L. Hackman, Mrs. Gilbert J. Paul, and Mrs. Harry A. Usner.

Guest speaker Miss Verna Criss, home economist director from Reading, spoke on "Women in Foreign Lands," mainly describing women of the Philippines and Japan.

Commemorating the anniversary, each past president was called upon to relate memories of her years of service The Pennsylvania Society of Farm Women was not always so named. The name was changed during the first world war from "Die Hausfrauen" to its present one

Officers elected for 1967 are Mrs. William B. Eberly, president; Mrs. Willis D. Stober, vice president; Miss Marian Martin, secretary; Mrs Raymond Riehl, assistant secretary, and Mrs. Harvey Gehman, treasurer.

POMONA GRANGE ADDS TO FARM & HOME FUND

Lancaster County Pomona Grange #71 held its regular meeting October 15 at the Fulton Grange Hall, Oakryn; 70 people attended. Eighteen received the Fifth Degree.

Master, Charles G. McSparran, presided at the business meeting when another donation was given the Lancaster County Farm and Home Center building fund. The following were appointed on the entertainment committee for fifty farmers and wives from England next spring: Robert McSparran, Mrs. Chester Eby, Richard Maule and Mrs. Clifford Holloway, Jr.

Mr. and Mrs Charles McSparran will represent Lancaster County Pomona Grange at the State Grange convention at New Castle, Oct. 24-27. Alternate delegates are Mr. and Mrs. Gyles Brown.

Remarks were given by Edgar J. Brosius of Jefferson, New Hampshire, and by Past State Grange Master, J. Collins McSparran.

The next meeting will be a dinner meeting on January 21 The executive committee, Alfred Wanner, Clair Murphy and Richard Maule, will determine the location.

Cattle On Feed In Pa. Up 27 Percent

Cattle feeders in Pennsylvania had 56,000 cattle and calves on feed for slaughter market on October 1, 1966, according to the Pennsylvania Crop Reporting Service. This was an increase of 27 percent from the 44,000 on feed a year earlier and up 2 percent from the 55,000 on feed July 1. Fed cattle marketed during the July to September quarter totaled 39,000, up 6,000 head or 18 percent from a year earlier. There were 40,000 head placed on feed during the quarter compared with 30,000 placed during the same quarter in 1965. Reflecting the increase in placements, there were 35,000 on feed less than 3 months on October 1 compared with 26,000 a year earlier, 8,000 on feed 3-6 months compared with 9,000 a year earlier; and 13,000 on feed more than 6 months compared with 9,000 a year earlier The 56,000 cattle on feed October 1, 1966 breakdown by weights are as follows. under 500 pounds, 4,000, 500-699 pounds, 7,000 700 899 pounds, 18,000, 900 1099 pounds, 17,000, and 1,100 pounds and over 10,000. Expected marketings for the October-December quarter at 23,000 if realized, would be 35 percent above the marketings of 17 000 for the same period in 1965

U.S. CATTLE ON FEED UP 8 PERCENT

Cattle and calves on feed for slaughter market on October 1 1966 in 32 major feeding States totaled 7,943,000 head 8 percent more than a year earlier

Increases from a year earlier were shown for all weight groups The number placed on feed during the past quarter was 6 percent above the same quarter a year earlier Marketings during this period were up 12 percent

STATE COW NUMBERS CONTINUE TO DECLINE

Milk production in Pennsylvania in September totaled 527 million pounds, approximately two percent less than in September 1965, according to the State Crop Reporting service

Production per cow averaged 710 pounds for the month, highest for any September on record, and up 20 pounds from September a year ago

The number of milk cows in the state in September was estimated at 742,000, down 2,000 from the previous month and 37,000 from September 1965

SEPT EGG PRICES UP BUT PRODUCTION FALLS

September egg production in the state declined approximately four percent from a year earlier said the Pennsylvania Crop Reporting Service

The September total, 245 million eggs was 11 million below production of September 1965 The number of layers in flocks September 1 was five percent less than a year earlier, PCRS pointed out

Prices received by egg producers averaged 46 cents a dozen during the month, six cents higher than in September 1965

Fertilize Now!

YULE PROFIT WITH ORTHO!

Every ton of ORTHO UNIPEL fertilizer you buy now is good for valuable Christmas gifts—top-drawer merchandise for everyone in your family. Remember, the more ORTHO UNIPELS you take delivery on now, the more gifts you'll have for keeping or giving for Christmas.

Fertilize now and life will be easier come Spring, too. Because you spread your work-load away from the busy planting season, and eliminate planting delays due to wet, cold Spring weather. You'll come out ahead. So come in and talk it over. We'll help you tailor an ORTHO UNIPEL program for your crop.

(Continued from Page 1)

"But what makes the headlines in the U.S. consumers' newspapers? That farmers are making $44 billion dollars a year; not that their share is $10 billion less than it was four years earlier," he thundered.

"One-third of the goods that fill Mrs. Consumer's shopping cart at the super market are NON-FOOD items, but they're all charged to the food budget and that's the figure she refers to when she complains about high food prices," Biggs said.

"Only 18 cents of the consumers' food dollar ever finds its way to the farmer," he said, adding, "We've got to get that story across to the consumer."

After describing the so-called master plan, which was proposed several years ago by Senator Russell of the U.S. Senate, Biggs asked, "Is this the program we want? We'll have to decide pretty soon," he warned; "Those consumers aren't picketing the food markets for nothing"

Biggs, a Fulton County beef cattle breeder, congratulated the county association on its becoming the number one county affiliate of PFA in membership. It had been announced earlier that 1966 county association membership stood at 947, compared to 818 last year, and 750 in 1964 The goal for 1967 will be in the area of 1100 members, which would assure Lancaster of being the first county in PFA to pass the 1000 mark. Membership committee chairman Clarence Stauffer reminded the group that the 1967 membership drive will start January 2nd. He urged the committee to get the membership drive done early by starting early.

Members re-elected six directors to two-year terms: James M. Garber, Mount Joy R2; John H. Charles, Millersville R1; James G. Kreider, Quarryville R1; Ellis K. Mantzer, New Holland R2; Leroy Pfautz and Noah W. Wenger, both of Stevens R1.

Members also approved 12 proposals submitted by the policy committee and one from the floor. The 13th proposal was offered by J. Robert Hess, Strasburg R1, stating that PFA support a move to increase the limit the county commissioners can appropriate for county extension work. At present, $20,000 is the maximum that can be appropriated, Hess said, adding that in large, agriculturally-active Lancaster County, this is not sufficient.

Association president Noah Wenger announced that a testimonial dinner was being planned for retiring Congressman Paul Dague. It is set for November 25, 6:45 p.m., at the Dutch Town and Country Inn at Vintage. He urged all members to attend.

Milk Support Price Announced

Dairy farmers were assured by Secretary of Agriculture Orville Freeman last Friday that the present $4.00 a hundredweight support price on manufacturing milk will be continued through the 1967 marketing year, which begins April 1. The present support price of 68 cents a pound for butterfat in farm-separated cream will also be continued, Freeman said.

Since prices of milk sold for consumption as fluid milk are closely related to prices of milk used in manufacturing dairy products, Freeman said the action also will help maintain prices that farmers receive for milk marketed under federal milk marketing orders.

"I am announcing the dairy support level for 1967-68 at this time so dairy farmers can plan their future dairy herd management with greater confidence as to next year's prices, and to provide greater assurance of adequate supplies of milk and dairy products for consumers," Freeman said.

"Dairy farming requires more advance planning than many other types of farming. As consumers, we can all be grateful that dairy farmers have responded to a long-needed improvement in the prices they receive for milk. September production was only one percent below the September 1965 level, whereas production last January and February, was five percent below that of the corresponding months in 1965."

● Mirror Holds Key

(Continued from Page 1)

afternoon session was William Johnstone, Penn State agricultural economist.

In concluding his talk on the future of dairying in Pennsylvania, Johnstone predicted that "those who remain (in dairy farming) will have to do a better job than is generally being done now, but they will also get better incomes" for their efforts

Johnstone told the dairymen that the milk price structure nationally is more favorable now than at any time during the past 15 years But, he added, improved prices have historically led to increased total milk production. He cited three major periods of declining cow numbers since World War II In each case, he said, there has been about an 18-month lag between the peak and low before the cow number decline reversed itself

History may repeat itself this time too he said advising dairymen not to get too complacent over the improving milk price

Looking ahead, he said the immediate future is more favorable for dairymen than it has been in a number of years. "People have higher incomes, are better educated and more concerned about diet and nutrition — all of which points to a better future for milk "

The economist said that competition will be the biggest problem for the eastern dairyman in the future With better transportation, milk will be more readily moved from producing to consuming points This would be a good time he said, for agencies and cooperatives serving dairymen to start doing the things which will have to be done to market more dairy products in the future

A panel consisting of five specialists discussed managing of herd replacements They were Dr. Vince Nielson Milk Specialities Company, George E Brightenback Merck & Company; Courtney Burdette and LaMont Smith TUCO Products Div of Upjohn Company; and Dr Thomas G Culton, Miller & Bushong

Other speakers in addition to Guss and Johnstone were: Jack Taschner Dow Chemical Company, and Robert E Gregory, Miller & Bushong

ROTATE FLOWER BEDS

The fungi bacteria and nematodes that cause root and vascular diseases overwinter in the soil, says Carlton F. Taylor, extension plant pathologist at Penn State University. While planning your garden for next year, do not put the same plant species in areas where the diseases were serious this year

Luscious Desserts For Fall

It's harvest time again. Cranberries lie crimson on the bog; pumpkins peep out amidst the cornstalks in the field — their bright gold color ablaze in the golden sunlight. These fruits remind us of fall and all the delicious desserts they can make. For instance — this Pumpkin Ice Cream Mold covered with Mincemeat Sauce. What dessert could be more typically "fall" than this?

PUMPKIN ICE CREAM MOLDS WITH MINCEMEAT SAUCE

1 quart vanilla ice cream, softened
1 cup pumpkin
½ cup packed brown sugar
¼ teaspoon nutmeg
¼ teaspoon salt
¼ teaspoon ground cloves

Mincemeat Sauce:

1 pound jar prepared mincemeat
1 tablespoon grated orange rind
½ cup apricot nectar

In a large mixing bowl blend pumpkin, brown sugar, nutmeg, salt, and cloves. Add ice cream. With mixer at low speed beat ice cream into pumpkin mixture until smooth and well blended. Pour ice cream into 10 individual salad molds. Freeze at least 24 hours. Remove from freezer and unmold by dipping molds into a pan of tap water for a few seconds. Invert onto chilled serving dishes. Serve at once with warm or chilled mincemeat sauce.

MINCEMEAT SAUCE: In a heavy saucepan, combine all ingredients. Heat slowly 5 minutes. Serve hot or cold.

* * * *

CARAMEL PUMPKIN FLAN

1¼ cups sugar
1 cup canned pumpkin, solid pack, or 1 cup mashed cooked pumpkin
½ teaspoon salt
¾ teaspoon ground cinnamon
¼ teaspoon ground ginger
1 teaspoon vanilla extract
1 pint light cream
5 eggs, lightly beaten
½ cup heavy cream, whipped
Ground nutmeg

Heat 1 cup sugar slowly in heavy skillet, stirring constantly with a wooden spoon until the sugar melts, is free from lumps, and turns a light caramel color. Pour into a heated 7-inch round, 2-inch high tin or plain 5 cup mold. Turn the mold round and round until inside is well coated. Let the caramel set. Meanwhile, combine pumpkin with remaining ¼ cup sugar and next four ingredients. Add cream to eggs and blend into pumpkin mixture. Pour into caramel-coated tin. Set in a pan of hot water. Bake in a preheated moderate oven (350 degrees) for 65 to 70 minutes or until a knife inserted in center comes out clean. Remove from oven and lift out of hot water. Cool and chill. To serve, run a spatula around the sides of pan; turn out onto serving plate. Serve with whipped cream, lightly sprinkled with nutmeg. Makes 8 servings.

* * * *

MOLASSES-CRANBERRY PUDDING

3 cups sifted all-purpose flour
½ cup sugar
2 teaspoons baking powder
½ teaspoon salt
2 teaspoons cinnamon
½ teaspoon ginger
2½ cups cranberries
1 cup molasses
⅔ cup warm water
¼ cup melted butter

Sift together flour, sugar, baking powder, salt and spices. Stir in cranberries. Combine molasses, water and butter; stir into flour mixture. Turn into a greased 9x13-inch pan, or into two 8-inch square pans. Bake in a 350 degree oven 20 to 25 minutes. Serve with Nutmeg Sauce or with ice cream or whipped cream. Makes 12 to 18 servings.

***NUTMEG SAUCE**

1 cup sugar
1 tablespoon cornstarch
¼ teaspoon salt
1¼ cups water
2 tablespoons butter
¾ teaspoon nutmeg

Combine sugar, cornstarch and salt in a saucepan; stir in water. Cook over medium heat, stirring constantly, until mixture thickens and comes to a boil. Remove from heat; stir in butter and nutmeg. Makes about 1½ cups.

* * * *

CRANBERRY BAVARIAN CREAM

1 (1 pound, 1-ounce) package pound cake mix
2 eggs
¾ cup milk
2 cups sugar
1 cup water
1 pound fresh or frozen cranberries
3 tablespoons grated orange rind
2 envelopes unflavored gelatine
Juice of 1 large orange, adding water if necessary to make ½ cup
4 egg yolks
1 cup milk, scalded
1½ teaspoons vanilla extract
1 pint heavy cream, whipped

The day before, prepare and bake pound cake mix according to label directions. Next day, trim top and sides of cake. Cut into approximately 1-inch wide fingers. Lay against sides of greased 9-inch spring form pan. Line bottom with remainder of cake. Dissolve 1½ cups sugar in water; bring to a boil. Add cranberries and orange rind. Bring to a boil again; cover and simmer 5 minutes. Uncover. Raise heat to highest point; boil rapidly, stirring constantly for 5 minutes (mixture will be

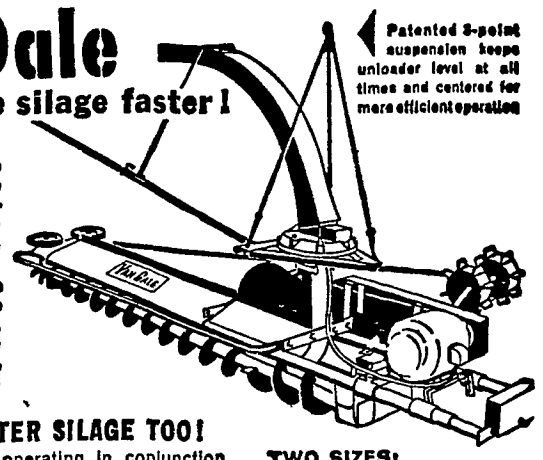
Get the BIG silo unloader value!

VanDale

Delivers more silage faster!



Patented 3-point suspension keeps unloader level at all times and centered for more efficient operation

- Double auger system digs the silage faster and more evenly under all conditions whether silage is frozen, wet, or dry.
- Exclusive, adjustable drive hub gives more positive traction, keeps the machine operating evenly, and requires less power.

DELIVERS BETTER SILAGE TOO!

The double augers, operating in conjunction with the patented V-paddle impellers, *digs* the silage, mixes it thoroughly, and then *throws* it down the chute. Your cows and cattle get good, palatable silage . . . not a powdered mash as often happens with unloaders using blowers.

TWO SIZES:
Standard—for silos 10' to 18'
Heavy Duty—for silos 18' to 30'

thick). Force through a strainer. Pulp should measure 2 cups. Set aside. Soften gelatine in orange juice. In top of double boiler, beat together egg yolks and ½ cup sugar. Pour milk over egg mixture. Cook over simmering water, stirring constantly until slightly thickened. Remove from heat. Add vanilla extract and softened gelatine. Stir until dissolved. Cool 5 minutes. Gradually stir in cranberry puree. Refrigerate stirring occasionally, until mixture mounds when dropped from spoon. Fold in cream. Pour into lined cake pan. Refrigerate 4 hours or until set. Makes 12 servings.

Spiced Coffee would really set off some of these desserts—

SPICED-COFFEE

Thinly pared rind from ½ orange
1 cinnamon stick, 2 to 3 inches in length
1 vanilla pod

To prepare 8 cups of coffee place above three ingredients in the water. Make coffee as usual. Top with whipped cream and serve with your favorite dessert.

Farm Women No. 13 Hold 35th Anniversary

Farm Women Society Group 13 marked its 35th anniversary Saturday at a dinner meeting honoring four past presidents and current president Mrs. Isaac Koser, at the home of Mr. and Mrs. Abram Groff, Mount Joy. Past presidents were: Mrs. Harry Zook, Mrs John Denlinger, Mrs. Samuel Good, and Mrs. Ervin Brown.

Mrs. John Denlinger was in charge of arrangements for the meeting which was attended by 52 members and husbands.

In celebration of the anniversary, Mrs. Harry Zook read the history of the first meeting, which was held at Bird-in-Hand, and gave the highlights of the following years.

Grant Hurst, a McCaskey High School teacher, spoke on "Developing a Sense of Humor".

The following officers were elected for 1967: Mrs. Harry Zook, president; Mrs. Raymond Denlinger, vice president; Mrs. William Bard, secretary; Mrs. John Bare, corresponding secretary, and Mrs. M. S. Whitmyer, treasurer.

At the County Farm Women Convention November 5 at Solanco High School, Society 3 and 13 will be in charge of banquet registrations.

The next meeting will be at the home of Mrs. William Kane, Leola, on November 11.

Way back in the 1870's, food took 58% of all the consumer earned. Now, the figure is 18.2% of disposable income — the lowest in history.

Ladies, Have You Heard? . . .

By Doris Thomas, Extension Home Economist

THOMAS

It's Worth Knowing

Buy U.S. Grade A or AA eggs for frying and hard cooking. U.S. Grade B eggs would be a good buy for scrambling or for use as an ingredient in cakes and casseroles. The size of the egg has no bearing on its quality. Instead you might prefer Extra Large or smaller Mediums. When you compare prices, check both the size and the quality grade.

Sauerkraut originally came from China. Back in the Third Century, B.C. a Chinese emperor added a form of kraut to supplement the rice diet of laborers building the Great Wall. His cabbage . . *fermented in* rice wine . . . improved his men's nutrition and became an international food. Rich in ascorbic acid and low in calories, sauerkraut is also easy on the budget.

Broiler and fryers are about 9 to 12 weeks old when marketed. Because they are young birds, they will be tender.

If you plan to buy a large beef purchase from a freezer-supplier, list the cuts and size portions your family prefers, and be careful about picking a reliable firm. Choose a grade high enough in quality to be worth freezing. Most consumers prefer U.S. Choice. No meat is a bargain unless your family will eat it . . . so buy quality meat. Remember . . the hindquarter will have more steaks and roasts, the forequarter more pot roasts, stew, and ground meat

When you want a top-quality apple, buy U.S. Extra Fancy, U.S. Fancy, and combination U.S. Extra Fancy and U.S. Fancy. For red apple varieties, the redder the skin the higher the grade. Choose higher grades when high color is important, lower ones when economy is more important.

Kitchen Tools

Tools in your top kitchen drawer should prove their worth through frequent use. Tools seldom used may not be worth the space they take and may well be discarded The very minimum tools you need include measuring kit of stacked cups, spoons, and glass measure; tongs; turner, rotary beater, portable hand mixer, or standard mixer; grater, paring knife and slicer; French cook knife; two sizes of spatulas; openers, and rubber spatula

Champion Cow At Green Dragon Show Nets $900

Top cow at the annual dairy cow show and sale at Green Dragon Livestock Sales last Friday was sold to Herb Mowery, Oxford R1, for $900.

The 4-year-old Holstein, Windhill Winterthur Violet, was sired by Winterthur Ivanhoe Eden Pete, and was out of Windhill Pabst Bula. In her last 305-day lactation she had 15,435 lbs. of milk and 522 lbs. of butterfat. She was shown by Calvin Bowser, Worthington, and Sam Kennedy, Mars, Pa.

First place in the Guernsey and mixed breed divisions went to cows shown by Al Albright, Landisburg, Pa

A local entry by Fritz Bros., Lancaster, was second place Guernsey; she was sold to Charles Myers, Lancaster, who also bought the third and fourth-place mixed breed entries

Other local buyers included. Isaac Wenger, Leola R1; J C. Nolt, Leola R1, Melvin Kolb, Lancaster; and Paul Weaver, Ephrata R2

Judges were Marvin Eshleman, Strasburg; Melvin Kolb; and Fred Naugle, Carlisle.

State's First Tree Farm Rededicated

GETTYSBURG — Nearly 300 people recently witnessed the rededication of the state's first Tree Farm during the Pennsylvania observance of the Silver Anniversary of the American Tree Farm System.

Owned by The Glatfelter Pulp Wood Company, the Tree Farm consists of 1763 acres of well-managed forest land and is located five miles west of Fairfield in Adams County.

Maurice K. Goddard, Secretary, Pennsylvania Department of Forests and Waters, stated that 19 years have elapsed since this Tree Farm was formally dedicated. "Since then a multitude of other Pennsylvanians have followed the leadership of the Glatfelters and have added their support to this forward looking venture."

Official rededication of the Tree Farm in the American Tree Farm System was a highlight of the dedication. Frederick T. Murray, Chairman, Pennsylvania Forest Industries Committee, made the presentation to The Glatfelter Pulp Wood Company. P. H. Glatfelter accepted the certificate for his company.

The American Tree Farm System, now celebrating its 25th Anniversary year, is sponsored nationally by the industry-supported American Forest Products Industries, Inc.

People never appreciate parents until they are one.

● Brubaker Wins

(Continued from Page 1)

this high honor.. They were Larry Weaver, New Holland R1, and Harold Herr, Millersville R1.

It had been seven years since another Lancaster Countian first brought home the honor of a national FFA office. He was Dean Hoffer, Manheim R3. Hoffer, a graduate of Manheim Central High School, is presently a dairyman in the Manheim area. His office was also regional vice president.

Brubaker's duties will include public relations work, FFA tours of national officers to visit foundations, local chapters, and various agribusiness firms.

Long active in FFA activities, Brubaker was named State Star Farmer in 1964, and later North Atlantic Star Farmer. In the same year he was secretary of the State FFA.

At home he raises about 5000 broilers and 8000 meat pullets, plus 8 acres of tobacco and 15 acres of corn.

Also honored at Kansas City was the Grassland FFA Chapter of Garden Spot High School. The National Chapter award was accepted by Adam Zimmerman, chapter president. Grassland was one of 30 chapters receiving the award.

Florin Farms Adds To Local Land Holdings

Florin Farms, Inc., Mount Joy R1, has signed agreement for purchase of two farms totaling 228 acres, according to an announcement this week by Florin vice president and treasurer J. Musser Wolgemuth.

The two East Donegal Township farms, situated along the Donegal Springs Road, were known as the Carmany farms

Although no plans for the land purchase were announced, the land is well suited for general farming, dairying, or future residential and industrial development, Wolgemuth said. Principal owners of Florin Farms, Inc, are A. and J Musser Wolgemuth, both of Mount Joy R1

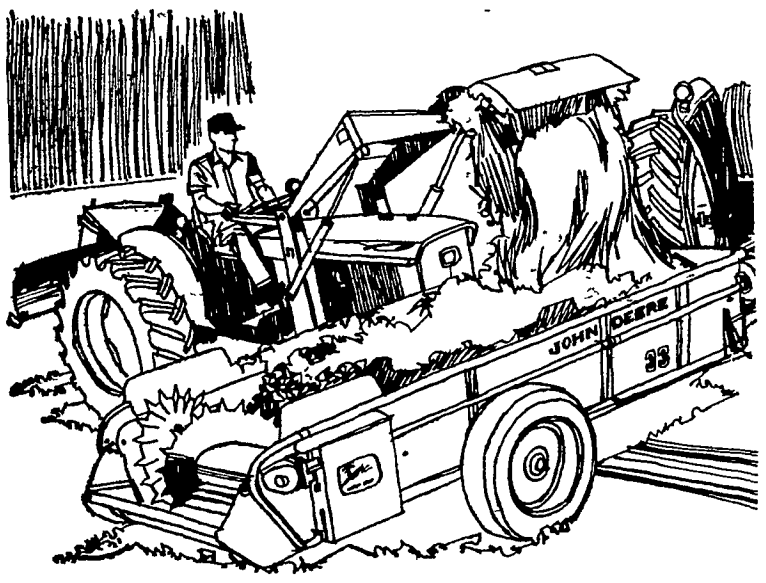
Pick a John Deere 53 h.p. 2020 to make hay, get this bonus...



A feedlot tractor that lets you control traction, shuttle shift, and move tons!

Do you know the "2020" is the only tractor in its class with a 1,000 rpm midpoint PTO and dual-speed rear PTO? Great for haying ... but beyond that the "2020" provides a mechanical direction-reverser, standard equipment, for shuttle-shift loading. It's available with differential lock for traction control in "swampy" feedlots. And the "2020's" closed-center hydraulic system delivers ample power to hoist one ton per bucketload. It's a lot of tractor considering its competitive price tag. Test-drive one soon. Credit available.

Feeders everywhere are talking about Ful-O-Pep Cattle-izer Beef Supplement

In feedlot after feedlot—commercial and farm—feeders are reporting better gains and conversions at lower feed cost.

The reason: It's Ful-O-Pep Cattle-izer Beef Supplement . . . designed to enable the beef animal to get up to 20% more energy from the same amount of feed . . . and to use that extra energy for faster, more efficient gains.

Gain, efficiency of gain, cost of gain, market value of cattle, and other factors are reflected in net return. And *net return,* cattlemen are reporting, is higher when Ful-O-Pep Cattle-izer Beef Supplement is fed.

Annual Dairy Show And Sale

OCTOBER 26, 1966

300 HEAD OF TOP DAIRY COWS 300

This is your opportunity to purchase replacements for your herd out of the best group of dairy cows that you have had the privilege of selecting from in the past year. Our shippers have put forth special effort to purchase those cows that were not for sale and the only thing that moved them was the willingness of the consignors to pay a premium for the cows they picked.

Among this group you will find some of the following:
Ten direct Daughters of Osborndale Ivanhoe.
One 4 year old with a record of 17,670 milk, 605 B.F.
One 3 year old, 248 day record of 14,123 milk, 560 B.F.
One Naches Hoogland Flashy Boy, 2 year old Daughter Dam's record, 2 year, 300 days 14,497 milk, 533 B.F.

One Milk & Honey Ivanhoe Daughter. Dam has record of 20,161 milk, 925 B.F.

One Weber Sensation Burke Dam.
One Lucifer Pabst Korndyke Dam.
One Brownview Pabst Fifty Five Dam.
One Rosafe Citation R. Daughter.
Two Seiling Rockman Daughters. This Sire is the Grand Champion bull of Canada.

Two Lassie Leader Daughters.
One Mayers Dark Leader Daughter with an average test of 4.7.

Two Mayview Dunloggin Direct Daughters.
Two Woodbine Inka Reflection Daughters.
One Lassie Leader Daughter bred to Kyren Farms Anthony.
One 4 year old Jupiter Daughter.
The above are some of our outstanding consignments, so you can see that this is your opportunity for purchasing foundation cows or for replacements.

Judging begins at 10:00 A.M.
Sale to start at 12:00 P.M. with the sale of show cows to begin at 1:30 P.M.

Come early and select your cows at this sale.

Keystone Hybrids

IS THE SMALL FLOCKOWNER GETTING HIS PULLET CHICKS AT THE SAME PRICE AS THE BIG "EGG FACTORY" OPERATOR?

WELL, USUALLY NOT.

BUT HE CAN IF HE ORDERS HIS CHICKS FROM US, BECAUSE WE CATER TO THE SMALL AND MIDDLE-SIZED POULTRYMEN.

And not only do we keep the price down, but we also give them a "top-notch" pullet that can perform with the best in the land, regardless of how high a price.

Our K-1700 Hybrids have been field-tested and entered in the Pa. Laying Test over the past two years and they came through with a very high performance.

We are now booking K-1700 Hybrid chicks for the 1967 season at $25.00 per 100 pullet chicks, delivered. No extra charge for debeaking or dubbing.

Test a sample pen of K-1700 Hybrids against a pen of Hylines, DeKalbs, Babcocks, Shavers, Kimbers, Garbers, Ghostleys or any other pullets of your choice.

FIGURE for YOURSELF, THINK for YOURSELF and then make your OWN decision.

During the daytime hours of 7:00 A.M. to 5:30 P.M. we have authorized Charles E. Sauder & Sons, Phone 445-3931, to accept chick orders by phone.

Thirty-Six 4-H Youths Honored At County Junior Leader Banquet

The 4-H'er chosen "outstanding junior leader" at the Lancaster County Junior Leadership Recognition banquet Thursday night at the Dutch Town & Country Inn, Vintage, was Nancy Risser, Leola R1.

Miss Risser, a student at Alfred University in western New York, was unable to be present for her citation. Her report, however, was read by Judy Buckwalter of Lititz R3.

In part, Miss Risser praised the teen leadership project as a boon to the general 4-H program since it helps supplement the critical shortage of adult leaders

Two other outstanding junior leaders, Daniel Rohrer of Manheim R1, who was also master of ceremonies for the evening, and Terri Ann Shank, Elizabethtown R1, gave reports on leadership needs and activities.

Countians heard a report on junior leadership activities in the Berks County area from a guest team consisting of junior leaders Janine Phillips and Nancy Brown.

Thirty-six Lancaster Countians were presented with certificates from Penn State University and lapel pins by Winthrop Merriam, associate county agent, and Mrs. Joanne K. Bowman, assistant home economist.

Those honored were:

James R. Esbenshade, Quarryville R2; Judy Buckwalter, Lititz R3; Reba Shelly, Lititz R2; Anjette Long, Lititz R3; Vicki J. Shank, Elizabethtown R1; Candy Seiverling, Lititz R1; Shirley Buckwalter, Lititz R3; Marta Smith, Lititz R1; Nancy Lorah and Margaret Lorah, Stevens R1; Mary Jane Nolt, Stevens R1; Sandy Rohrer, Manheim R1;

Carol Rohrer, Manheim R1; Carol Hess, Mount Joy R2; Brenda Hess, Mount Joy R2; Betty Barley, Millersville R1; Linda Porter, Washington Boro R1; Pat Bare, Witmer; Donna Denlinger, Gordonville R1; Evelyn Huyett, Gordonville R1; Gale Sheaffer, Kinzer Avenue, New Holland; Nancy Hoober, State Street, New Holland; Shirley Myer, Main Street, New Holland;

Carol Eby, Gordonville R1; Brenda Burkholder, Custer Avenue, New Holland; Dennis J. Allen, Quarryville R2; Daniel Rohrer Manheim R1; Terri Ann Shank, Elizabethtown R1; Ellen Good, New Holland; Martha Fisher, Manheim; Linda Martzall, Denver; Lois Enck, Stevens R1; Eric Stoner, Lancaster; Nancy Risser, Leola R1; and Martha Kilheffner, New Holland.

Hon. Mention To Weaver In Nat. Poultry Judging

An honorable mention certificate in National Future Farmers of America poultry judging competition at Kansas City, Missouri went to Linford L Weaver last week

Weaver, the son of Mr and Mrs Luke Weaver of Ephrata R1, qualified for national competition by placing first in the state poultry judging contest at Penn State University in June He is a member of the Cloister FFA Chapter and a Senior Vocational Agriculture student at Ephrata High School

The three-man Pennsylvania team won a bronze emblem award in the 33-state event The Penna team included gold medal winner Stephen Mattern, Herndon; bronze medalist Ronald Crouser, Stoneboro, and Weaver

Linford Weaver

The poultry contest included the following events. (1) Place two classes of production hens, (2) Select breeding birds; (3) Grade 24 eggs for interior quality (4) Grade 24 eggs for exterior quality; (5) Grade 10 livemarket fowl; and (6) Grade 10 dressed fowl

The poultry team and 51 other members of the Penna delegation traveled to Kansas City from Harrisburg by train on Sunday evening, Oct. 9th and returned Oct 16th Charles E Ackley, Ephrata Vo-Ag instructor, accompanied the poultry team as coach

The team participated in many activities in addition to the judging contest They visited the Chicago Board of Trade, National FFA Convention, Swift packing plant, American Hereford Association, TWA Overhaul base National Ag Hall of Fame in Kansas, Truman Library, and the American Royal Horse Show and parade

The Baron Stiegel Lions Club of Lititz R2 sponsored Weaver's trip to Kansas City,

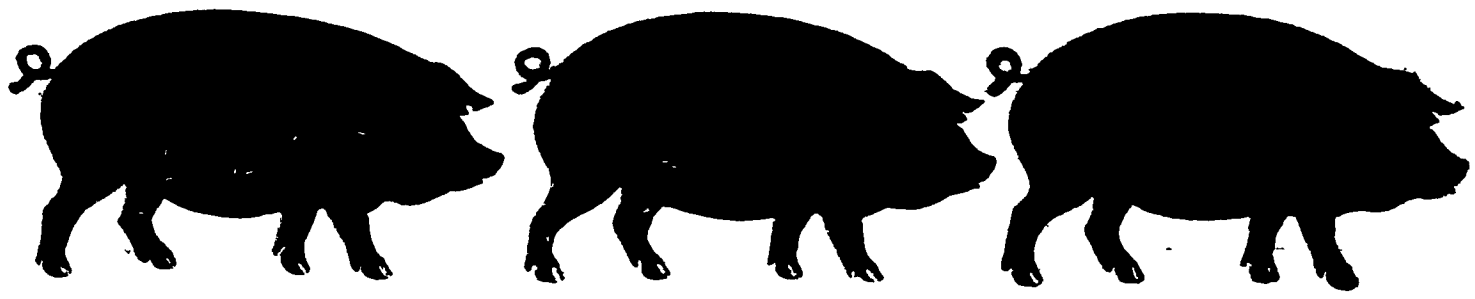
HOGS become pork *fast...*



when they are raised on

RED ROSE

SWINE FEEDS

Red Rose "Litter to Market" feeds are the feeds you need to start your pigs — and feed them all the way to market time. Many hog raisers have found that if they raise their hogs on Red Rose Swine Feeds, they reach market weights sooner — and become better pork fast!

Here is the reason.

The Red Rose Swine Feeding Program has been scientifically developed — to reduce the cost of producing pork by converting more of the feed into good solid meat.

Red Rose Farrowing Ration Pellets (containing Furazolidone) is the feed suited for sows two weeks prior to and one week following farrowing to aid in the prevention of scours. During late gestation, lactation and early growth of pigs Red Rose Pig & Sow Pellets meet exacting nutritional needs. For early acceptance of feed by young pigs feed Red Rose Pig Pre-Starter Pellets, then follow with Red Rose Pig Starter Pellets. Red Rose Pig Grower Pellets follows the starter pellets in the feeding program — for pigs from 50 to 100 lbs. To improve the condition of sows and to increase nutritional carry-over to pigs and provide added nutrition, use Red Rose T-C Feed. For worming, use Red Rose Worming Pellets. Red Rose Porkmaker — **a complete feed** — should be used for finishing hogs from 100 lbs. to market weight. If you mix some of your own feeds Red Rose Hog Supplement will fit into your schedule. It's a balance of quality protein and essential nutrients and vitamins to economically produce rations you need.

Profit is what you want from your hog raising operation . . . and **you will get it if you** start the Red Rose Swine Feeding Program now. When you place Red Rose Swine Feeds in the feed troughs you'll find that your pigs really "make hogs of themselves . . . fast!"

Red Rose HORSE FEEDS

You'll find coupons in every bag of Red Rose Horse Feed ● Super Horse Feed ● Classic Horse Feed ● Equimader Feed Supplement ● Lancaster Horse Pellets ● good toward **free Johnson Rope Halter.**
